PAIN

www.elsevier.com/locate/pain

Subject Index Volume 107 (2004)

Acceptance
The effects of failing to control pain: an experimental investigation, **107**, 227
Accuracy
A randomized trial of electronic versus paper pain diaries in children: impact on compliance, accuracy, and acceptability, **107**, 213
Acquired immune deficiency syndrome
Novel mechanism of enhanced nociception in a model of AIDS therapy-induced painful peripheral neuropathy in the rat, **107**, 147
Acute pain
Effects of 1-Hz repetitive transcranial magnetic stimulation on acute pain induced by capsaicin, **107**, 107
Acute surgical pain
Comprehensive description of newborn distress behavior in response to acute pain (newborn male circumcision), **107**, 242
Adaptation
Effects of stimulus duration on heat induced pain: the relationship between real-time and post-stimulus pain ratings, **107**, 256
Agreement
Understanding recall of weekly pain from a momentary assessment perspective: absolute agreement, between- and within-person consistency, and judged change in weekly pain, **107**, 61
Allodynia
Anti-hyperalgesic activity of the cox-2 inhibitor lumiracoxib in a model of bone cancer pain in the rat, **107**, 33
Analgesia
Addition of ultralow dose naloxone to postoperative morphine PCA: unchanged analgesia and opioid requirement but decreased incidence of opioid side effects, **107**, 41
Anger
The effects of failing to control pain: an experimental investigation, **107**, 227
Anxiety
Marital functioning, chronic pain, and psychological distress, **107**, 99
Attention
Disengagement from pain: the role of catastrophic thinking about pain, **107**, 70
Attitudes
Oral health attitudes and communication with laypersons about orofacial pain among middle-aged and older adults, **107**, 116
Beliefs
Oral health attitudes and communication with laypersons about orofacial pain among middle-aged and older adults, **107**, 116
Biomarker
Cystatin C in cerebrospinal fluid is not a diagnostic test for pain in humans, **107**, 207
BOTOX®
Subcutaneous administration of botulinum toxin A reduces formalin-induced pain, **107**, 125
Botulinum toxin A
Subcutaneous administration of botulinum toxin A reduces formalin-induced pain, **107**, 125
Canadian Community Health Survey
Chronic back pain and major depression in the general Canadian population, **107**, 54
Cancer pain
Anti-hyperalgesic activity of the cox-2 inhibitor lumiracoxib in a model of bone cancer pain in the rat, **107**, 33
Cannabinoid receptor agonist
Local application of the cannabinoid receptor agonist, WIN 55,212-2, to spinal trigeminal nucleus caudalis differentially affects nociceptive and non-nociceptive neurons, **107**, 267
Capsaicin
Cholinergic modulation of nociceptive responses in vivo and neuropeptide release in vitro at the level of the primary sensory neuron, **107**, 22
Capsaicin
Effects of 1-Hz repetitive transcranial magnetic stimulation on acute pain induced by capsaicin, **107**, 107
Catastrophizing
Disengagement from pain: the role of catastrophic thinking about pain, **107**, 70
Central hypersensitivity
Evidence for spinal cord hypersensitivity in chronic pain after whiplash injury and in fibromyalgia, **107**, 7
Cerebrospinal fluid
Cystatin C in cerebrospinal fluid is not a diagnostic test for pain in humans, **107**, 207
Chronic
Verbally reinforcing pain reports: an experimental test of the operant model of chronic pain, **107**, 167
Chronic low back pain
Exercise and chronic low back pain: what works?, **107**, 176
Chronic pain
A randomized trial of electronic versus paper pain diaries in children: impact on compliance, accuracy, and acceptability, **107**, 213
Chronic pain
Acceptance of chronic pain: component analysis and a revised assessment method, **107**, 159
Chronic pain
Chronic back pain and major depression in the general Canadian population, **107**, 54
Chronic pain
Marital functioning, chronic pain, and psychological distress, **107**, 99
Chronic Pain Acceptance Questionnaire
Acceptance of chronic pain: component analysis and a revised assessment method, **107**, 159
Clinical trial
Cystatin C in cerebrospinal fluid is not a diagnostic test for pain in humans, **107**, 207
Communication
Oral health attitudes and communication with laypersons about orofacial pain among middle-aged and older adults, **107**, 116
Compliance
A randomized trial of electronic versus paper pain diaries in children: impact on compliance, accuracy, and acceptability, **107**, 213
Compliance
Exercise and chronic low back pain: what works?, **107**, 176
Component analysis
Acceptance of chronic pain: component analysis and a revised assessment method, **107**, 159

doi:10.1016/S0304-3959(03)00512-8

Consistency
Understanding recall of weekly pain from a momentary assessment perspective: absolute agreement, between- and within-person consistency, and judged change in weekly pain, **107**, 61
Continuous
Effects of stimulus duration on heat induced pain: the relationship between real-time and post-stimulus pain ratings, **107**, 256
Coping
Communicative dimensions of pain catastrophizing: social cueing effects on pain behaviour and coping, **107**, 220
COX-2 enzyme inhibitors
Anti-hyperalgesic activity of the cox-2 inhibitor lumiracoxib in a model of bone cancer pain in the rat, **107**, 33
Craniofacial pain
Local application of the cannabinoid receptor agonist, WIN 55,212-2, to spinal trigeminal nucleus caudalis differentially affects nociceptive and non-nociceptive neurons, **107**, 267
Cystatin C
Cystatin C in cerebrospinal fluid is not a diagnostic test for pain in humans, **107**, 207
Depression
Chronic back pain and major depression in the general Canadian population, **107**, 54
Depression
Depression as a risk factor for onset of an episode of troublesome neck and low back pain, **107**, 134
Depression
Marital functioning, chronic pain, and psychological distress, **107**, 99
Development
Development of sensitivity to facial expression of pain, **107**, 16
Diaries
Understanding recall of weekly pain from a momentary assessment perspective: absolute agreement, between- and within-person consistency, and judged change in weekly pain, **107**, 61
Diary assessment
A randomized trial of electronic versus paper pain diaries in children: impact on compliance, accuracy, and acceptability, **107**, 213
Disease severity
Vulvar vestibulitis severity—assessment by sensory and pain testing modalities, **107**, 47
Distress
Comprehensive description of newborn distress behavior in response to acute pain (newborn male circumcision), **107**, 242
Ecological Momentary Assessment
Understanding recall of weekly pain from a momentary assessment perspective: absolute agreement, between- and within-person consistency, and judged change in weekly pain, **107**, 61
Electronic diaries
A randomized trial of electronic versus paper pain diaries in children: impact on compliance, accuracy, and acceptability, **107**, 213
Ethological methods
Comprehensive description of newborn distress behavior in response to acute pain (newborn male circumcision), **107**, 242
Exercise
Exercise and chronic low back pain: what works?, **107**, 176
Experimental pain
Disengagement from pain: the role of catastrophic thinking about pain, **107**, 70
Expression
Development of sensitivity to facial expression of pain, **107**, 16
Facial action coding system
Development of sensitivity to facial expression of pain, **107**, 16
Facial expression
Development of sensitivity to facial expression of pain, **107**, 16
Failure
The effects of failing to control pain: an experimental investigation, **107**, 227
Fibromyalgia
Evidence for spinal cord hypersensitivity in chronic pain after whiplash injury and in fibromyalgia, **107**, 7
Formalin
Cholinergic modulation of nociceptive responses in vivo and neuropeptide release in vitro at the level of the primary sensory neuron, **107**, 22
Formalin model
Subcutaneous administration of botulinum toxin A reduces formalin-induced pain, **107**, 125
Gender differences
Addition of ultralow dose naloxone to postoperative morphine PCA: unchanged analgesia and opioid requirement but decreased incidence of opioid side effects, **107**, 41
Glutamate release
Subcutaneous administration of botulinum toxin A reduces formalin-induced pain, **107**, 125
Handheld computer
A randomized trial of electronic versus paper pain diaries in children: impact on compliance, accuracy, and acceptability, **107**, 213
Highly active anti-retroviral therapy
Novel mechanism of enhanced nociception in a model of AIDS therapy-induced painful peripheral neuropathy in the rat, **107**, 147
Hyperalgesia
Anti-hyperalgesic activity of the cox-2 inhibitor lumiracoxib in a model of bone cancer pain in the rat, **107**, 33
Incidence
Depression as a risk factor for onset of an episode of troublesome neck and low back pain, **107**, 134
Inflammation
Cholinergic modulation of nociceptive responses in vivo and neuropeptide release in vitro at the level of the primary sensory neuron, **107**, 22
Inflammatory pain
Subcutaneous administration of botulinum toxin A reduces formalin-induced pain, **107**, 125
Labor pain
Cystatin C in cerebrospinal fluid is not a diagnostic test for pain in humans, **107**, 207
Lay consultation
Oral health attitudes and communication with laypersons about orofacial pain among middle-aged and older adults, **107**, 116
Low back disability
Psychosocial factors predictive of occupational low back disability: towards development of a return-to-work model, **107**, 77
Low back pain
Depression as a risk factor for onset of an episode of troublesome neck and low back pain, **107**, 134
Lumiracoxib
Anti-hyperalgesic activity of the cox-2 inhibitor lumiracoxib in a model of bone cancer pain in the rat, **107**, 33
Magnetoencephalography
Movements modulate cortical activities evoked by noxious stimulation, **107**, 91
Marriage
Marital functioning, chronic pain, and psychological distress, **107**, 99
Mastectomy
Phantom phenomena in mastectomized patients and their relation to chronic and acute pre-mastectomy pain, **107**, 140
Meta-analyses
Pain and analgesic response after third molar extraction and other post-surgical pain, **107**, 86
Methodological quality
Exercise and chronic low back pain: what works?, **107**, 176
Mitochondrial toxicity
Novel mechanism of enhanced nociception in a model of AIDS therapy-induced painful peripheral neuropathy in the rat, **107**, 147

Molar extraction
Pain and analgesic response after third molar extraction and other post-surgical pain, **107**, 86
Morphine
Addition of ultralow dose naloxone to postoperative morphine PCA: unchanged analgesia and opioid requirement but decreased incidence of opioid side effects, **107**, 41
Motor cortex
Effects of 1-Hz repetitive transcranial magnetic stimulation on acute pain induced by capsaicin, **107**, 107
Movement
Movements modulate cortical activities evoked by noxious stimulation, **107**, 91
Muscarinic receptor
Cholinergic modulation of nociceptive responses in vivo and neuropeptide release in vitro at the level of the primary sensory neuron, **107**, 22
Naloxone
Addition of ultralow dose naloxone to postoperative morphine PCA: unchanged analgesia and opioid requirement but decreased incidence of opioid side effects, **107**, 41
Neck pain
Depression as a risk factor for onset of an episode of troublesome neck and low back pain, **107**, 134
Neuropathic pain
Cystatin C in cerebrospinal fluid is not a diagnostic test for pain in humans, **107**, 207
Neuroticism
The role of neuroticism, pain catastrophizing and pain-related fear in vigilance to pain: a structural equations approach, **107**, 234
Newborn male circumcision
Comprehensive description of newborn distress behavior in response to acute pain (newborn male circumcision), **107**, 242
Nociception
Cholinergic modulation of nociceptive responses in vivo and neuropeptide release in vitro at the level of the primary sensory neuron, **107**, 22
Nociceptive reflex
Evidence for spinal cord hypersensitivity in chronic pain after whiplash injury and in fibromyalgia, **107**, 7
Noxious stimulation
Movements modulate cortical activities evoked by noxious stimulation, **107**, 91
Nucleoside reverse transcriptase inhibitors
Novel mechanism of enhanced nociception in a model of AIDS therapy-induced painful peripheral neuropathy in the rat, **107**, 147
Operant
Verbally reinforcing pain reports: an experimental test of the operant model of chronic pain, **107**, 167
Opioid antagonist
Addition of ultralow dose naloxone to postoperative morphine PCA: unchanged analgesia and opioid requirement but decreased incidence of opioid side effects, **107**, 41
Opioids
Addition of ultralow dose naloxone to postoperative morphine PCA: unchanged analgesia and opioid requirement but decreased incidence of opioid side effects, **107**, 41
Orofacial pain
Oral health attitudes and communication with laypersons about orofacial pain among middle-aged and older adults, **107**, 116
Outcome measures
Exercise and chronic low back pain: what works?, **107**, 176
Pain
Comprehensive description of newborn distress behavior in response to acute pain (newborn male circumcision), **107**, 242
Pain
Development of sensitivity to facial expression of pain, **107**, 16
Pain
Evidence for spinal cord hypersensitivity in chronic pain after whiplash injury and in fibromyalgia, **107**, 7
Pain
Movements modulate cortical activities evoked by noxious stimulation, **107**, 91
Pain
Verbally reinforcing pain reports: an experimental test of the operant model of chronic pain, **107**, 167
Pain behaviour
Communicative dimensions of pain catastrophizing: social cueing effects on pain behaviour and coping, **107**, 220
Pain catastrophizing
Communicative dimensions of pain catastrophizing: social cueing effects on pain behaviour and coping, **107**, 220
Pain catastrophizing
The role of neuroticism, pain catastrophizing and pain-related fear in vigilance to pain: a structural equations approach, **107**, 234
Pain relief
Addition of ultralow dose naloxone to postoperative morphine PCA: unchanged analgesia and opioid requirement but decreased incidence of opioid side effects, **107**, 41
Pain threshold
Vulvar vestibulitis severity—assessment by sensory and pain testing modalities, **107**, 47
Painful peripheral neuropathy
Novel mechanism of enhanced nociception in a model of AIDS therapy-induced painful peripheral neuropathy in the rat, **107**, 147
Pain-related fear
The role of neuroticism, pain catastrophizing and pain-related fear in vigilance to pain: a structural equations approach, **107**, 234
Perceived control
The effects of failing to control pain: an experimental investigation, **107**, 227
Perseveration
The effects of failing to control pain: an experimental investigation, **107**, 227
Personality
The role of neuroticism, pain catastrophizing and pain-related fear in vigilance to pain: a structural equations approach, **107**, 234
Phantom phenomena
Phantom phenomena in mastectomized patients and their relation to chronic and acute pre-mastectomy pain, **107**, 140
Post-pain behavior
Comprehensive description of newborn distress behavior in response to acute pain (newborn male circumcision), **107**, 242
Postsurgical pain
Pain and analgesic response after third molar extraction and other post-surgical pain, **107**, 86
Pre-operative pain
Phantom phenomena in mastectomized patients and their relation to chronic and acute pre-mastectomy pain, **107**, 140
Primary afferent nociceptor
Novel mechanism of enhanced nociception in a model of AIDS therapy-induced painful peripheral neuropathy in the rat, **107**, 147
Psychological predictors
Psychosocial factors predictive of occupational low back disability: towards development of a return-to-work model, **107**, 77
Quantitative sensory testing
Vulvar vestibulitis severity—assessment by sensory and pain testing modalities, **107**, 47
Reinforcement
Verbally reinforcing pain reports: an experimental test of the operant model of chronic pain, **107**, 167
Relief
Understanding recall of weekly pain from a momentary assessment perspective: absolute agreement, between- and within-person consistency, and judged change in weekly pain, **107**, 61

Repetitive transcranial magnetic stimulation
Effects of 1-Hz repetitive transcranial magnetic stimulation on acute pain induced by capsaicin, **107**, 107
Risk
Depression as a risk factor for onset of an episode of troublesome neck and low back pain, **107**, 134
Sensory neuron
Cholinergic modulation of nociceptive responses in vivo and neuropeptide release in vitro at the level of the primary sensory neuron, **107**, 22
Single-photon emission computed tomography
Effects of 1-Hz repetitive transcranial magnetic stimulation on acute pain induced by capsaicin, **107**, 107
Social context
Communicative dimensions of pain catastrophizing: social cueing effects on pain behaviour and coping, **107**, 220
Spinal cord
Evidence for spinal cord hypersensitivity in chronic pain after whiplash injury and in fibromyalgia, **107**, 7
Static
Effects of stimulus duration on heat induced pain: the relationship between real-time and post-stimulus pain ratings, **107**, 256
Summation
Effects of stimulus duration on heat induced pain: the relationship between real-time and post-stimulus pain ratings, **107**, 256
Supervision
Exercise and chronic low back pain: what works?, **107**, 176
Supra-threshold
Vulvar vestibulitis severity—assessment by sensory and pain testing modalities, **107**, 47
Temporal
Effects of stimulus duration on heat induced pain: the relationship between real-time and post-stimulus pain ratings, **107**, 256
Verbal
Verbally reinforcing pain reports: an experimental test of the operant model of chronic pain, **107**, 167
Vigilance
The role of neuroticism, pain catastrophizing and pain-related fear in vigilance to pain: a structural equations approach, **107**, 234
Visual analogue scale
Effects of stimulus duration on heat induced pain: the relationship between real-time and post-stimulus pain ratings, **107**, 256
Vulvar vestibulitis syndrome
Vulvar vestibulitis severity—assessment by sensory and pain testing modalities, **107**, 47
Whiplash
Evidence for spinal cord hypersensitivity in chronic pain after whiplash injury and in fibromyalgia, **107**, 7
Wide dynamic range
Local application of the cannabinoid receptor agonist, WIN 55,212-2, to spinal trigeminal nucleus caudalis differentially affects nociceptive and non-nociceptive neurons, **107**, 267
Workplace injury
Psychosocial factors predictive of occupational low back disability: towards development of a return-to-work model, **107**, 77
YAG laser
Movements modulate cortical activities evoked by noxious stimulation, **107**, 91
